EDUCATION

Bachelor of Computer Science, Carleton University

April 2026

- Teaching Assistant for Web Applications Development | Entrance Scholarship of \$8000 and Deans' Honour List

WORK HISTORY

Software Developer Intern — Kinaxis

September 2025 - December 2025

- Developing TypeScript solutions for Maestro, AI-powered supply chain platform serving **Fortune 500 manufacturers**
- Led development of BigQuery optimizer Chrome extension, implementing AI-powered cost analysis integrating Vertex, automated query optimization using schema context, and dynamic schema ingestion from dataset JSON files
- Implemented keyboard accessibility for worksheet trees with **100%** interaction coverage and WCAG compliance
- Resolved network throttling failures leveraging synchronous state access, reducing previous timeouts to sub **10ms**

Software Engineer Intern — Autodesk

May 2025 - August 2025

- Contributed engineering solutions to Autodesk's flagship CAD/CAM product, Fusion with **4.6M+ users worldwide** leveraging C++, QT, React, and internal end-to-end automation framework with Gherkin-based testing
- Identified architectural gaps and coordinated cross-repository UI fixes for purchasable extension content and localization systems, improving user experience and purchase conversion rates
- Diagnosed and resolved critical build environment and dependency failures blocking engineering team productivity

Software Developer Intern — Dayforce (Ceridian)

May 2024 - December 2024

- Collaborated with cross-functional teams to build enterprise-scale HCM software, serving **6M+ users globally**
- Delivered full-stack, client-focused solutions in React, Redux, and .NET, enhancing user experience and functionality
- Implemented Cypress automation test suites, eliminating manual testing taking several minutes to **10 seconds**

Junior Software Developer — ClinCove

June 2023 - August 2024

- Founding engineer of an industry-first cloud-based clinical trial management platform achieving **35%** faster trial startup, ensuring regulatory compliance and data integrity using PostgreSQL
- Developed real-time tracking systems reducing monitoring costs by **40%** and CI/CD practices for data management
- Built responsive pages, features and dashboards in Angular, iteratively improving UI/UX to customer specifications
- Integrated JWT-secured end-to-end RESTful APIs, test-driven development with Jest testing, leveraging Ionic framework and component libraries to achieve full test coverage and reliable communication

Software Developer Intern — Trend Micro

September 2023 - December 2023

- Designed client-driven solutions for Deep Security, expanding platform capabilities and resolving deployment challenges
- Developed and maintained enterprise-level cloud security connectors for AWS, GCP, and Azure using Java EE, streamlining user authentication and improving system integration performance
- Created optimized Splunk dashboards, queries, filters, and visualizations to monitor cloud connection metrics for live customer data, efficiently handling **10,000+ synchronizations**, reducing processing time from minutes to **11 seconds**
- Strengthened AWS security infrastructure by addressing system vulnerabilities, meticulously tracking cloud resources

Software Engineering Intern — Ideabytes Inc.

Feb 2022 - Jan 2023

- Implemented backend features for Java application including automatic translations for international shipment documents, automated PDF merging, and end-to-end APIs connecting client and server
- Led development of a full-featured Angular admin portal for insurance package configuration and management
- Optimized Python script performance using hashmaps for dangerous goods classification, reducing data parsing time
- Maintained and optimized high-traffic client applications handling **1000+ daily transactions**
- Designed and implemented new database architecture with SQL solutions seamlessly integrating with legacy systems

PROJECTS

TW Lightwork: Technical Content Creator — YouTube

- Managing and creating educational content on tech, career, and lifestyle with over **1.7 million views** across platforms

SKILLS

Languages

Python, Java, JavaScript, PHP, C, C++, C#, TypeScript, SQL, HTML/CSS | English, French

Frameworks / Tools

Git, Angular, React, Node.js, .NET, Bootstrap, Selenium, MySQL, PostgreSQL, MongoDB, Docker
