EDUCATION

Bachelor of Computer Science, Carleton University

April 2026

- Teaching Assistant for Web Applications Development | Entrance Scholarship of \$8000 and Deans' Honour List

WORK HISTORY

Software Engineer, AI Automation — Autodesk

May 2026 - Present

- Built an evaluation dataset of PRs and improved AI code-review skill with Microsoft's SkillOpt against Claude/GPT baselines, raising recall for bug detection **47% → 61% (+13.9pp)** on held-out PRs
- Contributed to an AI-native, UI-tech-agnostic Fusion test platform using Flask, OmniParser, DINOv2/CLIP with SSO zero-config onboarding and accompanying Azure Cosmos DB analytics dashboard tracking **20K+ test runs**
- Extended internal MCP orchestration server giving coding agents one gateway to dev systems (Jira, Confluence, Slack, CI), with additional observability integration and agentic automation workflow that can complete a ticket end to end

Software Developer Intern — Kinaxis

September 2025 - December 2025

- Led development of BigQuery optimizer Chrome extension, implementing AI-powered cost analysis integrating Vertex, automated query optimization using schema context, and dynamic schema ingestion from dataset JSON files
- Implemented keyboard accessibility for Maestro, an AI supply chain platform serving **Fortune 500 manufacturers**, achieving **100%** interaction coverage and WCAG compliance
- Resolved network throttling failures leveraging synchronous state access, reducing previous timeouts to sub **10ms**

Software Engineer Intern — Autodesk

May 2025 - August 2025

- Contributed engineering solutions to Autodesk's flagship CAD/CAM product, Fusion with **4.6M+ users worldwide**
- Identified architectural gaps and coordinated cross-repository UI fixes for purchasable extension content and localization systems, improving user experience and purchase conversion rates
- Diagnosed and resolved critical build environment and dependency failures blocking engineering team productivity

Software Developer Intern — Dayforce (Ceridian)

May 2024 - December 2024

- Delivered full-stack, client-focused solutions for enterprise-scale HCM software serving **6M+ users globally**, and several automation test suites, eliminating manual testing taking several minutes to **10 seconds**

Junior Software Developer — Clincove

June 2023 - August 2024

- Founding engineer of an industry-first cloud-based clinical trial management platform achieving **35%** faster trial startup, ensuring regulatory compliance and data integrity
- Developed real-time tracking systems reducing monitoring costs by **40%** and CI/CD practices for data management
- Built responsive pages, features and dashboards in Angular, iteratively improving UI/UX to customer specifications
- Integrated JWT-secured end-to-end RESTful APIs, test-driven development with Jest testing, leveraging Ionic framework and component libraries to achieve full test coverage and reliable communication

Software Developer Intern — Trend Micro

September 2023 - December 2023

- Developed client-driven cloud security connectors for AWS, GCP, and Azure for legacy Java EE systems, streamlining user authentication and improving system integration performance
- Created optimized Splunk dashboards, queries, filters, and visualizations to monitor cloud connection metrics for live customer data, efficiently handling **10,000+ synchronizations**, reducing processing time from minutes to **11 seconds**

LEADERSHIP & PROJECTS

Chief Technology Officer — 4Ummah

August 2026 - Present

- Lead engineer and architect, deploying platform ground up for hundreds of users and leading a team of developers

TW Lightwork: Technical Content Creator — YouTube

- Managing and creating educational content on tech, career, and lifestyle with over **1.7 million views** across platforms

SKILLS

Languages

Python, TypeScript, JavaScript, Java, C++, C, PHP, SQL | English, French

AI / LLM

LLM Evaluation, Agentic SDKs, Azure OpenAI MCP, Langfuse, Vertex AI, Computer Vision

Frameworks / Tools

React, Node.js, Express, Flask, Angular, .NET, Docker, Kubernetes, Jenkins, Git, Cypress, Jest

Databases / Cloud

PostgreSQL, Azure (AKS, Blob Storage, Key Vault), Cosmos DB, BigQuery, AWS, GCP
